

Three-way rig

ChatGPT edition

Rig sheet — original assembly diagram

Job. Separates bait and sinker on two branches for controlled depth.

Components and build

Tie the main line to one swivel eye, a sacrificial sinker drop to the second, and a longer leader with hook or lure to the third. Test for tangles.

Fish it

Move slowly along a contour with sinker contact intermittent, not plowing. Keep leader clear during turns.

Pine Lake	Trace long deep basin edges.
North Lake	Follow the eastern wall and central corridor.
Adjustment	Shorten both branches in weeds or current.

CONTROL THE HOOKS, FISH AND LAW

Multiple branches tangle easily; transport assembled rigs in a keeper. Use tackle strong enough to retrieve the target promptly. Prepare pliers and a knotless rubber net before the cast. If a hook is deep, cutting the line can be less damaging than prolonged extraction. Verify exact-water 2026–27 rules, hook count, bait law and seasons before every trip.
